

ENVIRONMENTAL POLICY

The Société du Port de Valleyfield (SPV) has set the goal of continuously improving its environmental performance throughout its territory.

The Société du Port de Valleyfield is committed to:

Environmental Compliance

- Act in compliance while aiming to go beyond the obligations and other requirements to which the SPV subscribes.
- Utilize external environmental compliance audits across its entire territory.

Environmental Management

- Prioritize innovation, continuous improvement, as well as the development and adoption of recognized environmental practices.
- Identify and manage environmental risks associated with various projects and implement appropriate mitigation measures to minimize environmental impacts.

Environmental Protection

- Apply and promote pollution prevention principles both within its activities and those of its users.
- Report, rectify, and monitor environmental incidents to prevent their recurrence.

Continuous Improvement

- Promote a port culture of responsible management and continuous improvement in environmental protection.
- Develop and implement initiatives to advance environmental management, mitigate repercussions, and continuous improvement.

- Integrate environmental considerations into all aspects of port administration activities, including planning, development, operations, and emergency responses.

Communication

- Disseminate this environmental policy to employees, clients, and the public.
- Provide an account of our performance through performance indicators.

Collaboration

- Collaborate with clients, industries, governments, non-governmental organizations, and communities to enhance our environmental performance.
